

FREIGHT ROUNDTABLE DISCUSSION QUESTIONS

1. What concerns you most about the I-84 Hartford Project's construction?
 - a. Specific exit/street/detour issues
 - b. Wider regional impacts and/or detours
 - c. Maintaining reliability with customers and markets
 - d. Other?

2. What can be done to mitigate disruption from this and other major projects?
 - a. Detours, announcements, websites, real time traveler information feeds, etc.
 - b. Would you prefer typical construction duration that maintains limited traffic flow during the construction period versus complete, or extended highway closures for a shorter total duration construction period.

3. What are your key concerns or suggestions re: thru-movement and economic cooperation/competiveness?

4. Are there practices that your company has seen around the country that mitigate the disruption of major construction projects to freight that were successful? Why were they successful?
